Easy treatments (Tx)
'Treatments Made Easy'

EazeTx is an innovative software suite connecting Doctors, labs, pharmacies mainly. We also aim to connect patients so that the entire medical consultation to medicine dispersal cycle is brought under one roof. **EazeTx** is primarily, an online platform for individuals or a group of doctors to record, track and update their patient consultation details. Patients can be registered one time, and EazeTx will help doctors to track their patient Consultation details, Past history, Diagnostic details, Medicine and procedures. A complete solution designed to give on-demand access to caregivers and a best-in-class direct to consumer telemedicine system to capture new patients.

Features:

- Single page consultation
- Doctor can able to create medicine prescription template and investigation template for most common diseases or specialist patients' groups
- Configurable data capturing based on doctors needs
- Doctor consultation is location based, so multiple locations for consultation is possible
- Has intelligent follow-up and recall feature which sets appointments, sends confirmations and reminders too
- Role-based data security system to restrict the view of data based on their roles within the organization
- Prescription printing is made in a way that accommodate any type of printers
- Dedicated support team will support via phone, email, WhatsApp and even in person to quickly and decisively resolve issues, if any
- Allows doctors to view the entire patient list for the day by just one click, saving doctors time and trouble
- Auto-generates token number for patients waiting for the queue
- Offers advanced consultation reporting tools for creating detailed and flexible financial reports

We are confident that EazeTx, will bring about a radical shift in the way medical industry functions.
